

Food Security in Msunduzi

With current funding from IQRAA Trust MIDI is able to establish 4 permaculture gardens across the city; Loluvuyo Creche (Edendale), Sphamandla Community Centre (Esigodini), YFC Youth Centre (Swapo) and Eden Kids Foundation (East Street). All the identified organisations work with children and offer a feeding scheme programme. MIDI is therefore involved in assisting the organisations to grow their own nutritious food and educate the children in creating their own gardens in their own homes and communities. The project has been running since November 2017 and gardens are set to be established by April 2018
